

Eliete's Portfolio

1. Introduction

In technology area a portfolio is an excellent tool to show your skills and experience listed on a resume. Since I have some experience with mobile apps, I developed small projects and published the code on Github, I attended to tech meetups and took some courses in related area. My aim with this portfolio is to provide my relevant information to head hunters and employers to get a job in the tech area.

2. Expected List of Features

- About me section with simple highlights of mine;
- Link to my social media profiles;
- Downloadable resume;
- List of work experience and project context I developed;
- List of courses I took in tech area;
- List of events I attended in the related area;
- List of personal projects I developed and published on Github;
- Search box at the top of the page to allow people to search for my information easily;

3. Market Survey
